Université de bordeaux

I. Objectives of Intellectual Output 5

- “The aim is to identify and eliminate any remaining technical or other issues which may jeopardise the functions of the online course”.
- “At the end of this intellectual output, the online LMS teacher training course will be ready for the large-scale trialling phase”.

II. Timeline

August 2022: framework review - Assessment theory. **Synthesis**

September and October:

Modules reviewed by internal and external users and by peers - Internal review for Modules 0 and 4 by the Bordeaux team.

Sep. 8: partner meeting (7 and 8: Bordeaux team meeting)

21: Bordeaux team meeting: Assessment design / Assessment protocol - 3 forms

Oct. 5: Bordeaux team meeting

November

23: **Meeting with all the partners** to discuss the protocol - presentation of the assessment grid designed

Meeting with the team in charge of assessment (Greg, Darja, Greg , Sylvia)

Meeting with Sylvia, Greg, Nicolas

Research of external testers

By Nov. 30: Data collected from different sources: Internal reviews, external reviews, Moodle data, free comments and interviews with testers

→ **General recommendations grid** completed

Meanwhile: IO6 participant research (more than 25)

December

7: Meeting to present recommendations to the coordinator

14: General meeting to present general recommendations. **Global recommendations** sent to each partner.

January 2023

4: Bordeaux team meeting

Recommendations sent module by module

February 6:

IO5 data report sent

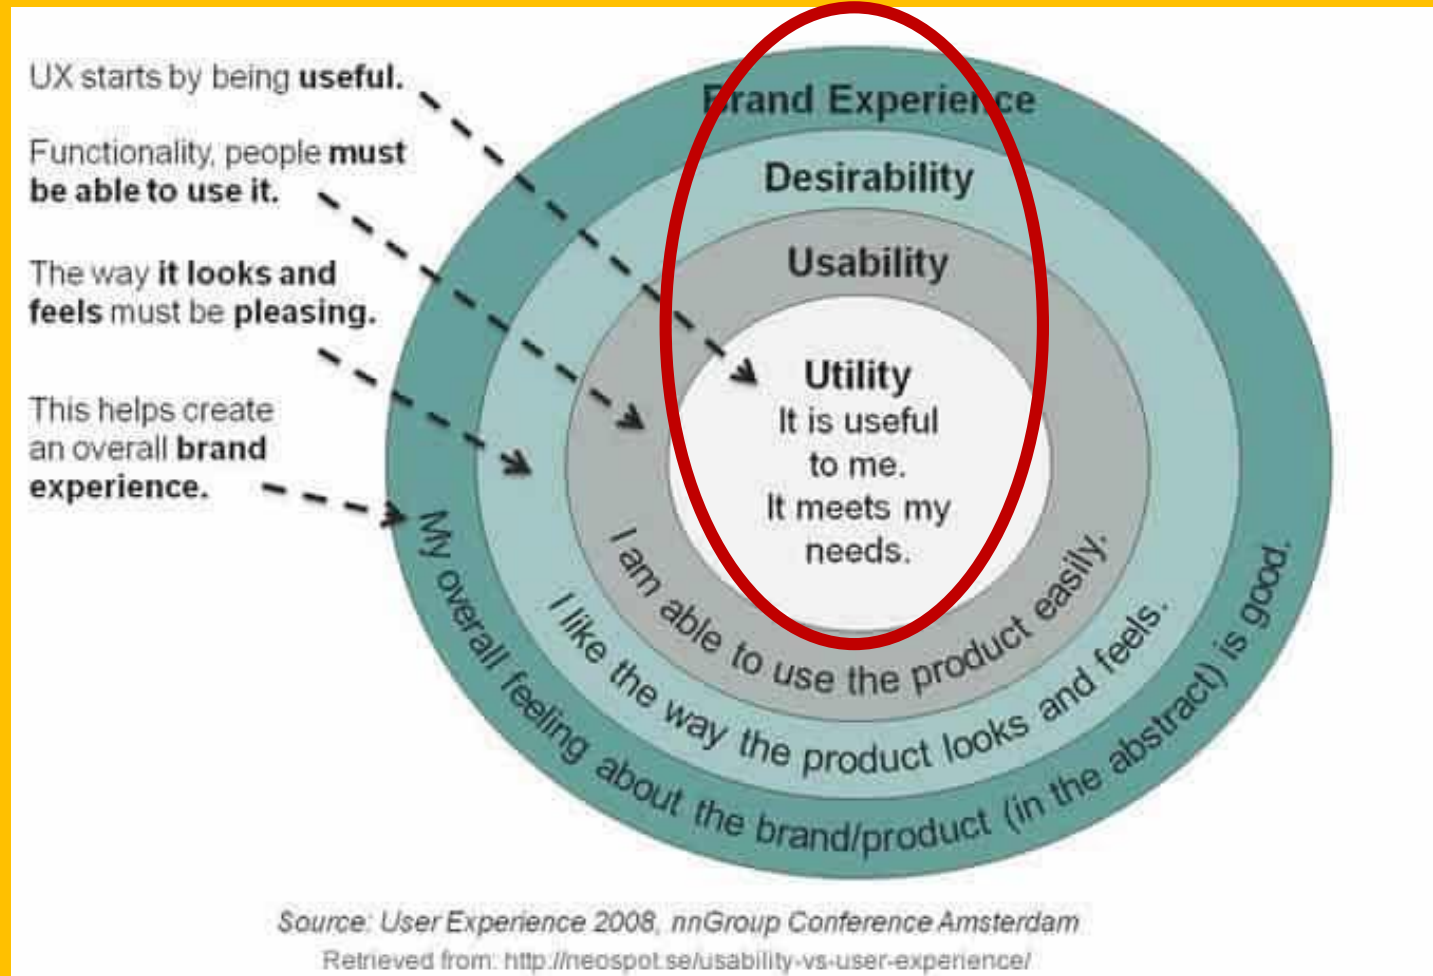

III. Methodology

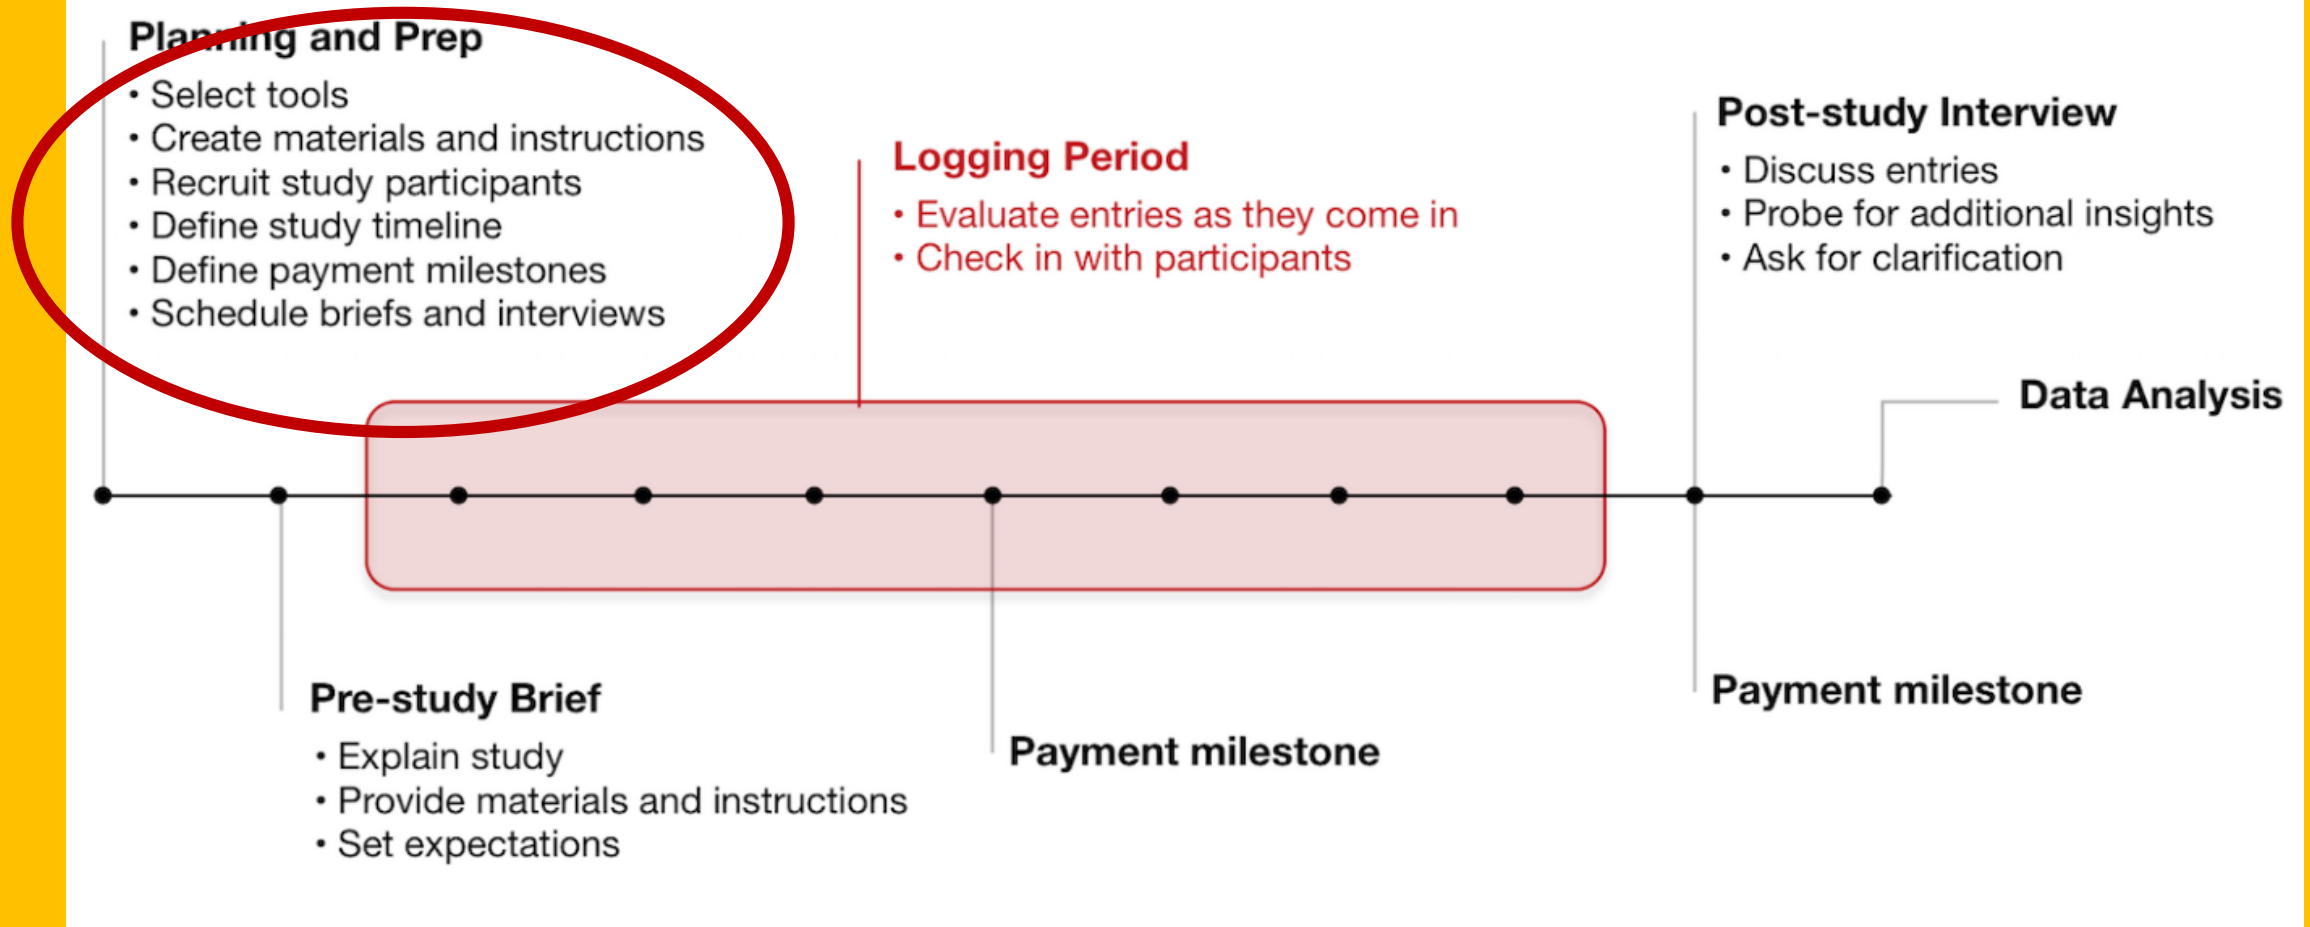

In intellectual output 5, the online LSP teacher training course is tested by project partners and selected external users.

3 sources of documents for analysis in IO5:

- Peer review
- Internal users
- External users

Research about user experience

In my opinion the following aspects of the Module no.X (listed in the horizontal line) that I have just finished, are ...

	Introduction with LSP learning outcomes	e-learning materials (videos, texts, etc.)	e-learning tasks / activities	incorporated self-assessment (quizzes)
appropriate for LSP: it meets my needs!	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no
simple to use, i.e. user-friendly (technical aspect)	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no
simple to solve (content difficulty)	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no
Attractive to me: it looks so good onscreen!	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no
Interesting and/or inspiring for me, for my future	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no 	<ul style="list-style-type: none"> •yes •not sure •no
	•	•	•	•

V. Recommendations:

- Organization issue:

The main problem was **the length of the modules and the time spent on them**

- Pedagogical issue:

The work done by all the teams is important and reflective. Therefore, it is necessary to adapt the content to allow all participants to understand what is expected from them and to do the activities according to their needs and level.

- Technical/linguistic issue:

Some linguistic mistakes and typos have been found.

All partners must

→ respect the time limit

→ make some activities optional

→ correct the typos and linguistic mistakes left.

Let's move on to IO6!

Thank you!
